Career Summary

Computer Science undergraduate specializing in Cybersecurity, with a strong focus on penetration testing and red teaming. Experienced in identifying vulnerabilities, securing systems, and building security-focused applications through real-world internships and projects. Proficient in tools such as Metasploit, Nmap, Wireshark, and Burp Suite. Seeking an internship or role in Cybersecurity, Ethical Hacking, or Software Engineering.

Education

Albukhary International University, Malaysia <i>Bachelor of Computer Science (Hons) in Cyber Security</i>	2026 – Present <i>Expected Graduation: 2028 CGPA: 3.89 / 4.00</i>
Albukhary International University, Malaysia <i>Foundation in Computing</i>	2024 – 2025

Experience

CodeAlpha <i>Python Programming Intern</i>	Jun 2025– Jul 2025 <i>Kedah, Malaysia (Remote)</i>
- Developed Python-based programs and scripts as part of a structured internship program. - Built a secure login system implementing input validation, password handling, and secure coding best practices. - Gained hands-on experience in Python programming, project structure, and software development workflows.	
CodeAlpha <i>Cyber Security Intern</i>	Jun 2025– Jul 2025 <i>Kedah, Malaysia (Remote)</i>
- Performed cybersecurity tasks including vulnerability assessment and secure coding practices. - Studied and applied concepts in authentication, access control, and common web vulnerabilities. - Worked with security tools and developed foundational skills in ethical hacking and penetration testing.	
Startek <i>Customer Service Agent & Technician</i>	Mar 2024– Sep 2024 <i>Sri Lanka (On-site)</i>
- Provided technical support and customer service to clients, resolving issues efficiently. - Coordinated with technical teams to troubleshoot and escalate complex cases. - Developed strong communication, problem-solving, and time management skills in a fast-paced environment.	

Hackathons & Competitions

AquaSense – Real-Time IoT Heavy Metal Detection System Hult Prize Competition – Runner Up	Dec 2025 – Present
- Developing a low-cost IoT-based water quality monitoring system for detecting heavy metals in aquatic environments. - Integrated computer vision on Raspberry Pi for color analysis and LoRaMesh communication for real-time remote monitoring. - Technologies: Raspberry Pi, ESP32, Computer Vision, IoT Sensors, LoRaMesh	

Projects

CodeAlpha Secure Login Project Python Security	2025
- Implemented a secure login system in Python with input validation, password hashing, and secure coding practices. - Focused on real-world authentication security and best practices for user data protection.	
HandWave-Snake Python OpenCV MediaPipe	2025
- Built a Python-based Snake game controlled by real-time hand gestures using a webcam, leveraging MediaPipe and OpenCV to detect hand movements. - Demonstrated skills in computer vision, game logic, and real-time input processing.	

Skills & Interests

Technical Skills: Python, Bash Scripting, JavaScript, Linux, SQL, HTML, CSS, Git, GitHub
Cybersecurity Tools: Metasploit, Nmap, Wireshark, Burp Suite, Kali Linux, Iptables/Firewall
Networking & Systems: Networking, Docker, Kubernetes, MySQL, Cron
Soft Skills: Critical Thinking, Problem Solving, Analytical Thinking, Continuous Learning, Adaptability, Team Working, Attention to Detail, Collaboration

Achievements & Certifications

- Runner-up, Hult Prize Competition — AquaSense IoT Heavy Metal Detection System
- Cyber Security 101 — TryHackMe (Issued Mar 2026)
- Pre Security Certificate — TryHackMe (Issued Nov 2025, Credential ID: THM-5RGBIGM7K1)
- Ethical Hacking Essentials (EHE) — EC-Council (Issued Jun 2025, Credential ID: NKBMUAZQ2B8R)
- Kali Linux Certificate — Board Infinity (Issued May 2025, Credential ID: GEF76RLAKYJR)
- JavaScript Essentials 1 — Cisco (Issued May 2025)
- Foundations of Cybersecurity — Google (Issued Apr 2025, Credential ID: ZEVVORXI7GXE)
- Ethical Hacking: Scanning Networks — LinkedIn (Issued Feb 2026)
- Ethical Hacking: Footprinting and Reconnaissance — LinkedIn (Issued Feb 2026)
